

 **march**
contemporary luggage

catalogue 2017

“ March products are developed and designed in The Netherlands, with focus on quality, functionality and elegant design. “

For over many years we've produced superb cases for every kind of journey. Impeccable design standards, careful choice of materials and exacting standards of workmanship combine to bring you a wide world of choice for every journey and every destination . Travelling with minimum effort is our constant aim, and with our wide choice of even lighter cases, we've made a vast difference to all kinds of journeys, especially those where door to door portorage is not an option. On the long walk through the airport terminal or out onto the railway platform, by ship, plane, car or train, wherever your life takes you, you can travel with confidence, because March cases take you there.

March products are made with care, following the highest and up to date quality standards. All our raw materials and manufacturing processes are subject to quality controls, which take place before production. Before mass-production, every developed product is tested in our lab and test centers. We subject all components such as body materials, trolley handle systems, handles, wheels, hardware materials individually to high levels of product control.

March products are designed, manufactured and extensively tested to withstand the rigours of today's travel. All our products go overpass 6 steps test, and subject to stringent quality controls

CABIN SIZE VARIETY

March's goal is to make products that our customers can rely on and enjoy. As such, we are committed to ensuring that we provide a range of products in a variety of cabin sizes matching current airline regulations to cater to the needs of travellers around the world, while also complying with airline industry requirements. We will always ensure to have a wide assortment of travel solutions for different needs, as soon as the market requires it.

Lightweight

With expert design and careful choice of materials, we've created luggage that's lightweight dream to handle, without compromising quality or security. Our ultimate goal is to provide the lightest luggage possible in order to make a difference to all kinds of journeys. With our range of lightweight cases, you'll benefit with every step.

Security

Security brings peace of mind and our TSA locks brings security plus. Travel Sentry Approved locks mean faster screening for checked-in luggage, because authorized personnel can gain access without delay or damage. And at all other times, they give high level protection to your possessions.

Wheels

Cases with 4 wheels allow upright rolling in any direction for effortless travel. So say goodbye to the suitcase with a mind of its own. Many of our cases have true 4-wheel mobility , so they go where you go. Travel can already be a wearying experience, so why make it worse ? Once you've tried a case that goes exactly where you want it to you'll wonder how you ever managed before.

Cabin Size

All our smaller models qualifies as carry-on luggage for 90% of airlines. So now you have a wider choice than ever for cabin-friendly convenience.

Expandable

Many of our soft cases have expandable features. Unzip the expanding section to release up to 20% more space whenever you need it.

Materials

We only use the high performance fabrics and hi-tech materials, such as PC Polycarbonate , ABS, PP and PET for our hard shell cases
